Netiquette

Respect the diversity of opinions among the instructor and classmates and engage with them in a courteous, respectful, and professional manner. All posts and classroom communication must be conducted in accordance with the student code of conduct. Think before you push the Send button. Did you say just what you meant? How will the person on the other end interpret the words?

Communication:

Faculty Communication with Students:

Discuss how faculty will contact students.

Student Communication with Faculty:

Discuss how students will contact faculty when they have questions or concerns.

Course Description:

MAT 125 Introduction to Statistics

3-0-3

Basic concepts of probability, descriptive and inferential statistics including central tendency, variability, correlation, regression, parametric tests. *General Education: M.*

Course Learning Outcomes:

Students will be able to:

- Describe a data set using measures of central tendency, variation and position.
- Calculate basic probabilities, including the addition and multiplication rules.
- Create confidence intervals and test hypotheses involving means and proportions
- Analyze bivariate data.

General Education Learning Outcomes:

Students will demonstrate mathematical skills and quantitative reasoning including the ability to

- interpret and draw inferences from mathematical models such as formulas, graphs, tables and schematics;
- represent mathematical information symbolically, visually, numerically or verbally as appropriate; and
- employ quantitative methods such as, arithmetic, algebra, geometry, or statistics to solve problems.

Program Learning Outcomes:

N/A

Course Resources:

Textbook:	Enter title, edition, author, ISBN for required text.
Materials:	Enter all additional required materials and tools needed to complete course here.
Access:	List access codes needed for websites or other software. .

Course Policies:
